+ Wedding 2010

**A comprehensive wedding
day photography guide.**

This special day deserves special photography. Glacier Graphics is committed to meeting your wishes and saving those incredible moments so you can cherish them for a lifetime.

Make it Magical

Capturing moments to remember

When it comes to wedding photography the moments are priceless. They'll live in your heart forever but you'll only see them with your eyes once. That's why it's so important to capture those moments when they come. I'm there to make sure your dream is captured and it's done in a way that makes you feel special when looking over your photographs just as you did walking down the aisle. A local complimentary consultation is the first step in

mapping out the day so not a moment is missed. Once you've decided on what package you want we'll locate your preferred locations for portraits, we'll schedule wedding day shoots, and then here comes the bride! Your reception is an important part of the day too and you'll want to remember it just as it happened, so the pictures continue until the moment your getaway car leaves the drive.
